

3 TOP TIPS

To Create Your
Enterprise Architecture
Data Ecosystem

→ Click to unlock business value

Matthijs Scholten
Product & Innovation Manager

#1

Make a Map of your EA Data Ecosystem

**Think big and start simple.
Visualize all information systems that can serve as a
source and / or destination for your EA information.**

#2

Formulate a Data Strategy

Start with the end in mind.

Ask yourself: what insights are most important for your key stakeholders? Focus on the insights, not just the data.

#3

Automate and Celebrate!

Put your data strategy to work. Automate integrations between BiZZdesign HoriZZon and key information sources by leveraging the BiZZdesign Open API.

Celebrate by sharing key insights with your key stakeholders. This will make your EA team's contribution to successful business change indispensable!

Let us know your tips in the Comments box!
